5. (Currently Amended) The phone of claim 2 1 further comprising:  
an address book function to enable the configuration and storage of an address book in  
the memory, the address book comprising a collection of at least one names and associated  
dialable numbers; and  
the queue dial function to cooperate with the address book to locate a dialable number  
associated with a name in the call queue.

6. (Currently Amended) A communication system of a communication service  
provider, comprising:  
a first computer system, comprising:  
a call queue for a wireless device, the call queue indexed by an identification of the  
wireless device; and  
a queue management function to provide a next number to dial from the call queue in  
response to receipt of a queue dial request from the wireless device.

7. (Original) The communication system of claim 6 further comprising:  
a user database, the user database comprising the call queue.

8. (Currently Amended) The communication system of claim 5, 6 further  
comprising:  
a second computer system to receive queue entries from a client device; and  
the second computer system to communicate the queue entries to the first computer  
system.

15. (Original) A method comprising:

dialing a first number of a call queue stored by a wireless communication device in response to a first operation of a queue dial function;  
removing the first number from the call queue; and  
dialing a next number of the call queue in response to a second operation of the queue dial function.

16. (Original) The method of claim 15 wherein operating the queue dial function further comprises:

operating a single button of the wireless communication device.

17. (Original) The method of claim 15 wherein operating the queue dial function further comprises:

speaking a queue dial command to the wireless communication device.

18. (Currently Amended) A method comprising:

dialing a first number of a call queue stored by a wireless communication device, in response to an operation of a queue dial function; **and**  
dialing a next number of the call queue in response to the operation of the queue dial function;

**removing the first number from the call queue as a result of dialing the first number; and**
